

## SCMPro

Presents

### Asian Supply Chain Thought Leadership Summit 2018

“Strategic Imperatives Re-Shaping Our Supply Chains”

and

### ISCM Leadership Retreat Series

“Designing contemporary supply chains for faster clock-speeds to cope with the increasingly volatile operating environment”

“Firms should be able to precisely measure the degree of misalignment across the entire enterprise, and take purposeful steps to close gaps and more finely align the enterprise with its customers and suppliers”

**December 14 & 15 2018**

**Venue: Mumbai**

An Initiative of:

## ISCM Leadership Retreat Series

### "Designing contemporary supply chains for faster clock-speeds to cope with the increasingly volatile operating environment"

Developed and delivered by:

**Dr. John Gattorna**, Global Supply Chain 'thought leader', Author & Executive Chairman, Gattorna Alignment.

And

**Dr. Rakesh Singh**, Chairman ISCM, Author, Researcher, Consultant, and Academic.

The ISCM Leadership Retreat is an exclusive gathering of top supply chain professionals, designed to push the boundaries beyond a traditional masterclass. Featuring small-group sessions, you will explore the emerging supply chain ecosystem and take away ideas you can implement to create a dynamically aligned enterprise supply chain.

#### Key Learning Objectives

**Geo-Political Realignment, Ecosystem Transformation, Changing Business Dynamics and its Impact on Supply Chains** – This session will explore the changing business and political landscape and the pressures on supply chains – across India, China and ASEAN. This will lead to a better understanding of the future of supply chains and how companies should architect their supply chains.

**Moving to Customer Centric Supply Chains** – If customer is king, companies need to sense customer needs and align their supply chain to this emerging paradigm. This session will explore how firms can co-create value to their customers through their supply chains using 'design thinking' principles

**Dynamic Alignment** - All companies have supply chains embedded in their structure, connecting multiple functions. This makes supply chains in aggregate "the business." This session captures the dynamic alignment paradigm – where the firm fully engages with the customer and suppliers to understand their expectations and use them to design the enterprise supply chain.

**Mastering Technology Trajectory** – Technology is a major disruptive force in supply chain. Adapted well, it has the power to transform the supply chain. This session delves into the technology disruptions – from IoT to Blockchain, from Augmented Reality to Scenario Building, from SMAC to Cyber Security and how companies can ride the technology wave, achieving E2E digitalization.

**Infrastructure:** Logistics infrastructure, clusters and your supply chains – the emerging realities: Are we prepared?

**Why Supply Chains Fail** - Supply chain disruption is something that many businesses face routinely. There can be many reasons - but only one outcome - lost sales and profits. This session deals with the causes and consequences of supply chain failure, from ensuring the leadership is in touch with the market to assessing the appropriate styles in the leadership group. From selecting staff profiles most appropriate for key roles to sharing experiences in transforming global supply chains.

The retreat ends with review, feedback, and closure Commitment to action

### Who Should Attend

The Master Class is aimed at senior supply chain professionals who have the responsibility to design the supply chains for their organizations.

### FORMAT:

Senior level, small-group, deep-content and interactive.

**Master Class Fee: INR. 60,000/- Plus 18% GST**

## Asian Supply Chain Thought Leadership Summit 2018

### “Strategic Imperatives Re-Shaping Our Supply Chains”

The world trade is going through a structural shift, partly in response to the rise of neo-nationalism, and partly due to changing geo-political equations. On the connectivity front, a slew of mega infrastructure projects like China’s Belt and Road initiative, the Australia, U.S., India and Japan joint initiative to establish an alternate joint regional infrastructure scheme, the Indo ASEAN connectivity projects are set to radically alter the supply chain abilities across India, China, ASEAN, China and Europe. On another level disruptive business models and technologies are pushing the boundaries of supply chain capabilities. As a nation we need to understand these dimensions and its impact on our businesses.

Supply chain strategists have the onerous task of translating this vision into value. This is not an option to us. The cost of not doing so can be disastrous - from losing market share to becoming history. Over the course of the day, an eminent panel of speakers from India and overseas will discuss and deliberate on the way forward for India.

#### Who should attend?

India's most important gathering of supply chain leaders, including: CXO's and senior supply chain professionals from sourcing, Distribution, Transportation, Planning, Demand Management, Supplier Relations, Quality and Regulations. You can meet 35+ speakers from Industry and Around 200 Industry decision makers.

#### Conference Themes

- Regional connectivity – Belt & Road; India ASEAN Connectivity; Australia, India, US & Japan connectivity - and its impact on supply chains in India
- Production Clusters, Logistics Clusters, and expanding logistics infrastructure in India and its impact on supply chain strategies.
- Technology convergence, disruptive innovations, and hype cycles – exploring reasons for failure, and explore how to successfully assimilate technology.
- Balancing operational challenges and customer dynamics – orchestrating the optimal inventory, network, logistics and distribution processes
- Customer-centric, agile, and cost-optimized - how to structure a market-leading logistics network that ensures customer stickiness.
- Why Supply Chains Fail – exploring the causes and consequences of supply chain failures, and building early warning signals in our value chains.
- Supply chain transformation – Innovation, Application and Value Creation – assessing our organizational readiness and nurturing talent
- Release of ISCM Research Report
- Awards Nite

Conference Fee: Rs. 20,000/-

# SCMPro Logistics & Supply Chain Awards 2018

## The Award You Cannot Miss

SCMPro, is launching the fourth SCMPro Logistics and Supply Chain Awards. The series of awards seeks to honour companies and individuals who are shaping the future of Logistics and supply chains in India.

The SCMPro awards are decided by a jury of eminent international academicians and experts, and reflects an un-biased opinion on the capabilities of the nominees.

### Award categories:

#### Excellence in Supply Chain Management

1. Supply Chain Company of the Year
2. Best use of Supply Chain Analytics
3. Best Distribution Practices - Inbound in Supply Chain in a Company
4. Best Distribution Practices - Outbound in Supply Chain in a Company
5. Innovative Inventory Planning in a Company
6. Productivity Improvement through Supply Chain
7. Best Supply Chain Company to work with.
8. Supply Chain Excellence in Cross Functional Collaboration
9. Best Supply Chain Visibility
10. Best Customer Care and Support

#### Corporate Outperformance

1. Best Supply Chain Risk Management Process
2. Highest Standards in Supply Chain Safety
3. Best Supply Chain Talent Development firm
4. Sustainability in SCM
5. Excellence in End to End Supply Chain Planning
6. Outstanding Supply Chain Strategy

#### Technology & Innovation

1. Best IT solution provider in Supply Chain and Logistics
2. Outstanding Digital Transformation in Supply Chain
3. Outstanding Supply Chain Innovation
4. Supply Chain Innovation in Logistics
5. Digital Transformation & Supply Chain Excellence
6. Innovations in Technology – Best use of IoT

## Individual Outperformance

1. Emerging Supply Chain Leader of the Year
2. Best Women Leader in Supply Chain
3. CSCO of the Year
4. Supply Chain Analytics Professional
5. Lifetime Contribution to SCM Profession

## Academics & Training

1. Best SCM Curriculum
2. Best Supply Chain Faculty
3. Best Research paper by faculty
4. Best Summer Project by Students
5. Best SCM and Logistics Skills Institution
6. Best Leadership Skills Development Institution

## Logistics Service Provider

### Business Verticals Awards

1. Best LSP for Pharmaceuticals
2. Best LSP for Automobile
3. Best LSP for Cold Chain Logistics
4. Best LSP for E-Commerce
5. Best LSP for Retail

### Corporate Awards

1. Best CSR among LSPs
2. Best LSP to work with
3. Best Innovations in LSP
4. Best Supply Chain Performance Improvement by LSP

### Institutional Awards

1. Best Express Logistics Service Provider
2. Best Freight Forwarder
3. Best Re-Location Service Provider
4. Best Contract Logistics Service Provider
5. Best Multi-Modal Service Provider
6. Best Project Logistics Service Provider
7. Best Reverse Logistics Service Provider
8. Best Humanitarian Logistics Service Provider
9. Promise of the Future

## Enabler Awards

1. Best Material Handling Service Provider
2. Best Consulting Services in Supply Chain
3. Best material Handling Equipment Manufacturer
4. Best Emerging Material Handling Company of the Year
5. Best Innovation in Material Handling Solutions
6. Best Automated Warehouse Storage Equipment Manufacturer
7. Consulting Services in Warehouse Building and Design

## Technology

1. Best Use of technology among LSP
2. Innovative SCM IT Solution Provider
3. Best Warehouse automation Solution
4. Innovative Technology Provider in Supply Chain
5. Innovative Use of Robotics in Supply Chain
6. Digital Transformation in 3PL Operations

## Individual Outperformance

1. Woman Visionary in Logistics
2. Young Supply Chain Professional – LSP
3. Logistics Professional of the Year
4. Lifetime Contribution

**Nomination Fee: INR 30,000/- for each nomination. Plus GST @18%**

## Past Attendees
